Research Plan

Background

- As we get older, our idea of play changes
- Play is a test of ability; full of rewards and opportunities that stimulate our core humanity.
- Play is a natural approach to learning; helps develop a growth mindset
- Why are play and learning are now seen as mutually exclusive? And does this affect Gen Z?
- This research plan seeks to identify insights for Gen Z young adults aged 18-25:
 - What types of activities are seen as playful and fun?
 - What performance gaps does this generation face in the workforce and in their daily lives?

Research methods

Secondary

- 1 Literature Review
- 2 Industry Reports
- 3 Psycho-Aesthetic Maps
- 4 Market Research
- 5 Ecosystem Mapping
- 6 Patent Research
- 7 Social Media Analysis

Primary

- 1 Interviews
- 2 Surveys
- 3 User Groups/ Focus Groups
- 4 Contextual Inquiry
- 5 Diary Study
- 6 Usability Test

Research scope and focus areas

Question Themes

Sources

What sources do the intended demographic use to get information regarding the transition from student life to the workforce like how to file taxes or how to manage the change in lifestyle?

Time

What amount of time in a week does the demographic dedicate to learning about these topics?

Engagement

What aspects of their current sources of learning keep them engaged?

Competition

Who is the competition?
What are they doing?

Research scope and focus areas

Design Focus Components

Learnability

The product/service has to be easy to use.

Memorability

When users return to the design after a period of not using it, how easily can they re-establish proficiency?

Efficiency

Efficient temporally and monetarily

Persuasive

How can we gamify the learning experience to keep the users engaged consistently?

Research scope and focus areas

Primary user scenarios

Pursuing vocational training Part of the gig-economy

Beginning their career in the workforce

Unemployed

Pursuing a degree

Users who have partners and have children

Users who have partners and do not have children

Users without partners

Research Participant Profiles

Alex, Age 18, M, US

Education

Recently graduated from high school, starting college in the fall
